

PERSONA: **Chris**

USER STORY/SCENARIO:

Testing the app in his everyday life and he runs into a problem.

Chris's wife has told him that she ordered from doordash for the both of them.

Chris is thinking to himself that this a good opportunity to test the nutrition tracker app.

Chris's wife has told him that the doordash order has arrived

Chris then scanned the food without typing anything to see if it works.

Chris waits for it to load and to his surprise it actually gave him the correct nutritional fact.

He also saw that the app had information about where the food was from.

The food order got placed for pickup, and David here wants to know what is the calorie intake.

David then goes to his room, scans his food using Nutrition facts app and lets the app scan the food.

**The order of Noodle soup, with french fries contains 775 Calories, 303 grams of carbs, 43 grams of protein, and 58 grams of fat.**

**The average takeaway meal can range approximately 700 to 900 calories.**

**The scanner then releases all the information that is found on David's food and shows David the nutrition and breakdown of his food.**
